DETAILED ACTION

Drawings

1. The drawings contain one sheet of figures 1-3 were received on 10/24/2003.

These drawings are objected by the Examiner for the following reasons.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the feature relating to a microscope having an eyepiece as recited in claim 8 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

4. The disclosure is objected to because of the following informalities: The Summary of the invention is objected to because it fails to provide a concise brief description of the invention as required. Appropriate correction is required.

5. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction

Art Unit: 2872

of the following is required. The specification has not positively provided supports for the features recited in each of claims 2 and 8-11.

Allowable Subject Matter

6. Claims 1-11 are allowed.
7. The following is a statement of reasons for the indication of allowable subject matter:

The zoom lens system as recited in present independent claim 1 is patentable with respect to the cited art by the limitations relating to the optical features of the lens elements and their arrangement as recited in the claim. While the use of a zoom lens system having lens elements arranged in a mirrored manner is known to one skilled in the art; however, the cited art does not disclose a zoom lens system having lenses elements arranged in a mirrored manner with optical features as claimed.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
